

W099 - Safety and Health on Construction Sites

The Hard Hat

With a regularity which has by now come to be rather taken for granted but which is nonetheless highly commendable, Editor Theo C. Haupt and Co-editor Richard J. Coble have produced the latest issue of the W099 Newsletter - The Hard Hat.

With its broad coverage of items related to health and safety on construction sites this number (Volume 2 Issue 4) features a brief note on the Evolution of a Corporate Culture by Andrew ShamRao (USA); a somewhat longer article by the same author on Shaping a Safety Culture (Part 1); a look back by Suzanne Bell (USA) at the recent Behavioral Safety Now Conference in Las Vegas and Part 1 of a Paper by Jim Frederick (United Steelworkers of America Health, Safety and Environment Department) on the topic of Comprehensive Health and Safety vs. Behavior-Based Safety.

The usual Calendar of events and other Commission items complete this interesting and topical publication.

A [pdf copy](#) of the latest edition is available.
