Applied Acoustics

ISSN 003-682X

Volume 60, Number 4, May 2000

- Special issue on automotive noise and vibration control
  Rajendra Singh, Ahmet Selamet
- Dynamic analysis of automotive clutch dampers
  C.L. Gaillard, R. Singh
- A hybrid approach for aeroacoustic analysis of the engine exhaust system
  Y. Sathyanarayana, M.L. Munjal
- Experimental investigation of in-duct insertion loss of catalysts in internal combustion engines
  Selamet, V. Kothamasu, J.M. Novak, R.A. Kach
- Evaluation through pressure and mass velocity distributions of the linear acoustical description of
  I. C. engine exhaust systems
  F. Payri, A.J. Torregrosa, R. Payri
- Automotive panel noise contribution modeling based on finite element and measured structural-
  acoustic spectra
  Teik C. Lim

Volume 61, Number 1, June 2000

- An improved room acoustic model
  Franco Cotana
- Effect of bulk-reacting liners on sound wave propagation in annular variable area ducts
  M.E. Aly
- Optimal noise control in a carpentry plant
  Esko Sorainen, Harri Kokkola
- Sound radiation from an un baffled elastic plate strip of infinite length
  Kazutoshi Michishita, Kimihiro Sakagami, Masayuki Morimoto, U. Peter Svensson
- Medium-range localisation of aircraft via triangulation
  Reinhard Blumrich, Jürgen Altmann
- Active control of the exhaust noise radiated by an enclosed generator
  María Cuesta, Pedro Cobo
- An exact method for analysing sound reflection and transmission by anisotropic laminates
  submerged in fluids
  Cai, G.R. Liu, K.Y. Lam
- Vibration characteristics of functionally graded cylindrical shells under various boundary
  conditions

Volume 61, Number 2, June 2000

- A physical insight of the active control on sound source in a pipe
  Kuo-Tsai Chen, Yun-Hei Liu
- Long time measurement of long range sound propagation over an ocean surface
  K. Konishi, Y. Tanioku, Z. Maekawa
- Effects of compression on the sound absorption of fibrous materials
  Bernard Castagnède, Achour Aknine, Bruno Brouard, Viggo Tarnow
- Applying equal-loudness compensation to the adaptive active noise control
  Woon-Seng Gan
- Frequency dependent control of reverberation time for auditory virtual environments
Volume 61, Number 3, July 2000

- Editorial(s)
  Jean-Louis Guyader
- Characterization of building equipment
  Michel Villot
- A pseudo-forces methodology to be used in characterization of structure-borne sound sources
  M.H.A. Janssens, J.W. Verheij
- Identification of vibration sources
  B. Pezerat, J.L. Guyader
- Towards a structure-borne sound source characterization
  B.A.T. Petersson, B.M. Gibbs
- MIMO technique for simultaneous measurement of translational and rotational mobilities
  L.H. Ivarsson, M.A. Sanderson

Volume 61, Number 4, August 2000

- Modelling of sound fields in enclosed spaces with absorbent room surfaces Part II. Absorptive panels
  S.M. Dance, B.M. Shield
- Modelling of sound fields in enclosed spaces with absorbent room surfaces Part III. Barriers
  S.M. Dance, B.M. Shield
- "The time has come" the Walrus said "to talk of many things"
  P. Lord
- An approach utilizing membrane materials to regulate modal characteristics of rooms
  T. Sakuma, T. Iwase, M. Yasuoka
- The effectiveness of floating slab track system - Part I. Receptance methods
  F. Cui, C.H. Chew
- A 64 element acoustic volumetric array
  Jonathan M. Rigelsford, Alan Tennant
- Sound field radiated by an infinitely long elastic plate strip in contact with a vertical reflecting surface
  Kazutoshi Michishita, Zenzo Yamaguchi, Kimihiro Sakagami, Masayuki Morimoto
- The determination of the acoustic properties of sound sources actively controlled in a square duct
  Kuo-Tsai Chen, Ju-In Lin
- Acoustoelastic determination of local surface stresses in polymethylmethacrylate
  Zhi Wei, Xiaojun Zhou, Yaodong Cheng
- Acoustic waves in a layered inhomogeneous ocean
  F.D. Zaman, Zeid I.A. Al-Muhameed
