TG39 - Deconstruction

Overview of Deconstruction in Selected Countries

CIB Publication 252, ISBN 0-9643886-3-4, Charles Kibert and Abdol Chini (Editors), University of Florida

Summary

The fully electronic CIB Publication "Overview of Deconstruction in Selected Countries," CIB Publication 252, edited by Charles Kibert and Abdol Chini of the University of Florida, has been completed and is available for downloading.

This Publication is the first product from CIB Task Group TG39 - Deconstruction and addresses the subject of deconstruction in eight countries: Australia, Germany, Israel, Japan, the Netherlands, Norway, the United Kingdom, and the United States.

Table of Contents

- Chapter 1. Introduction: Deconstruction as an Essential Component of Sustainable Construction by Charles J. Kibert and Abdol R. Chini, University of Florida, USA
- Chapter 2. Building Deconstruction in Australia by Philip Crowther, Queensland University of Technology
- Chapter 3. The state of Deconstruction in Germany by Frank Schultmann, Deutsch-Französisches Institut für Umweltforschung (DFIU)
- Chapter 4. The state of Deconstruction in Israel by Amnon Katz, Technion - Israel Institute of Technology
- Chapter 5. The state of Deconstruction in Japan by Mikio Futaki, Ministry of Construction
- Chapter 6. State of the art Deconstruction in the Netherlands by Bart te Dorsthorst, Ton Kowalczyk, Koen van Dijk and Pauline Boedianto, Delft University of Technology
- Chapter 7. The state of deconstruction in Norway by Lars Myhre, Norwegian Building Research Institute
- Chapter 8. United Kingdom Deconstruction Report by C. McGrath, Building Research Establishment, S.L. Fletcher, Sheffield University and H.M. Bowes, University of Salford

Application

The Publication addresses a wide range of major issues related to deconstruction including building disassembly, building regulations, government policy, economics, design for deconstruction, whole building reuse, deconstruction tools and techniques, materials recyclability and used materials resale.

Target Group

The Publication's purpose is to provide the international research community with a snapshot of deconstruction activities in various countries as part of a process to enhance the reuse and recycling of construction materials.
Format

This Publication can be downloaded at the CIB website [www.cibworld.nl](http://www.cibworld.nl) under the TG39 commission entry in the databases section, or at the Center for Construction & Environment website at the University of Florida [www.bcn.ufl.edu/sustainable](http://www.bcn.ufl.edu/sustainable) at the TG39 icon. In view of the large size (35 MB) of this work product, either the entire document or specific chapters can be downloaded. The Document is in Adobe Acrobat pdf format.
