Summary

These are the proceedings of the Building Education and Research Conference 2006 (BEAR 2006) held in April, 2006 in Kowloon, Hong Kong. "Construction Sustainability and Innovation" has been one of the major topics of discussion amongst the professionals of the built environment worldwide. This important topic was the theme of this year’s BEAR 2006 conference. The aim of the Conference was to provide a forum for the exchange of ideas between researchers, educators, practicing engineers, government officials and policy-makers. By considering sustainable construction and innovation in construction, we will be able to increase construction productivity and decrease the production of construction waste and hence protect the environment for our future generations.

Themes

The presentations in the Conference include the following themes and sub-themes:

- Education in the built environment,
  - E-Learning
  - Curriculum Design
