International Council for Research and Innovation
in Building and Construction

Providing a global network for international exchange and cooperation in research and innovation in building and construction, in support of an improved building process and of improved performance of the built environment.

May 2006

New Publication: TG51 – Usability of Workplaces

Report on Case Studies

CIB Publication No. 306 - ISBN Number 90-6363-047-6

Editor: Keith Alexander

Summary

This is the final report on the work of Task Group 51 Usability of Workplaces

The Report includes general concepts of usability, applied to the built environment to evaluate usability in different building types; a series of case studies has been documented, presented and discussed in different participatory workshops involving a mixed group of stakeholders; methods for evaluating usability at different stages of the life cycle of a building have been identified.

The contents of the CIB TG51 Final Report consists of a total of five case studies:

- NCR, Discovery Centre, Dundee, UK November 2003
- Old Mill, Turku, Finland April 2004
- Techno centre Renault in Guyancourt: The Building La Ruche, France September 2004
- Nord-Trøndelag University College, Nylåna, Røstad, Norway May 2005

- Örebro University Hospital: The O-building, Sweden September 2005

Format

Hard copy: A4, illustrated, 246 pages.
