August 2006

New Publication

Proceedings of the CIB Co-sponsored Conference Adaptables’06 “Adaptability in Design and Construction” held in Eindhoven, The Netherlands

ISBN 90-72152-03-4

Editors
Jan Westra, Frits Scheublin, Arno Pronk, Alexander Suma, Karin de Louw

Summary

The 4 volumes of this publication are together the official proceedings of the joint CIB Co-sponsored, Tensinet, IASS International Conference on Adaptability in Design and Construction. The Conference was held at the Eindhoven University of Technology from 2-5 July 2006 in Eindhoven, The Netherlands.

The Conference has addressed the following topics:
- Clients brief for Adaptability
- Open Building
- Industrialization in Construction
- Collaborative Engineering
- Realization of Adaptable Structures
- Design for Adaptability
- Engineering of Adaptable Structures
- Adaptable Materials
- Adaptable Mechanics
- Adaptable Morphology
- Architectural Management
- Adaptable Infrastructure
- Architectural Engineering
- Comfort Technology
Adaptables 2006 focused on the needs and drives for adaptation and looked at the new technologies and materials that were available. Adaptables brought together clients, designers, structural engineers and the construction industry each with their own visions and interests to exchange views and experiences in the field of adaptable buildings. All papers presented at the conference were accepted for final editing and included in the proceedings.

**Format**

The proceedings are available in 4 volumes hard copies and CD-ROM.

**Prices**

The price of the proceedings is 50 Euro excluding post and packaging.
