W070 – Facilities Management and Maintenance

Proceedings Trondheim International Symposium “Changing User Demands on Buildings – Needs for Lifecycle Planning and Management held in Trondheim, Norway

ISBN 82-7551-031-7

Editors
Tore I. Haugen, Anita Moum, Jan Bröchner

Summary
These are the proceedings of Trondheim International Symposium Changing User Demands on Buildings 'Needs for Lifecycle Planning and Management held on 12-14 June 2006, in Trondheim, Norway.

The symposium’s theme links together the different elements of Facilities Management and Maintenance ranging from the hard side with a focus on technical questions in maintenance and modernization to the softer side with strong focus on social, cultural and organizational issues related to Facilities Management and Maintenance.
The symposium has addressed the following sub-themes:

- Building Conservation and Refurbishment
- Sustainability in Facilities Management and Design
- Facilities Management – Operation and service management
- Changing user demands on adaptability and flexibility
- Workplace Management – Usability of workplaces
- Facilities Management in health care

The symposium has gathered researchers from 20 countries, and they have brought forward the body of knowledge and expertise on Facilities Management and Maintenance in an international perspective.

69 papers were accepted for final editing and included in the proceedings.
