At the Joint CIB W055/W065/W086 Symposium, "Construction in the XXI Century: Local and Global Challenges" was concluded on October 20th, 2006. The event was held in Rome, with over 200 delegates from 25 countries. The event was a great success, with special praise given to the exchange of thoughts and experiences amongst the participants and the possibility of developing personal trans-national connections. The large attendance by young people has determined a shift from a Euro-centric to a more international participation.

The scientific results presented and discussed were collected in the symposium proceedings, available for €35.00. For more information, contact info@artecweb.it.

CIB Commissions

The following CIB Commissions held their annual meetings in conjunction with the Symposium:

- TG56 – Macroeconomics for Construction (Click here for the Meeting Report)
- TG63 – Disasters and the Built Environment (Click here for the Meeting Report)
- W055 - Building Economics (Click here for the Meeting Report)
- W065 - Organization and Management of Construction (Click here for the Meeting Report)
- W086 - Building Pathology (Click here for the Meeting Report)

Special thanks to the organizers of the event: Ar.Tec, the Polytechnics of Bari and Milan, the Universities of Naples (Federico II) and Rome (La Sapienza) and Worcester Polytechnic Institute (USA).
