SB07 Seoul – International Conference Sustainable Building Technology “Thinking Earth for Human Beings”

27-28 June 2007, Seoul, Korea

Introduction

The Conference SB07 - Seoul International Conference Sustainable Building Technology “Thinking Earth for Human Beings” will take place on 27-28 June 2007, in Seoul, Korea. Recently, sustainability issues raised by the Kyoto Protocol on the climate change in 1997 is a international task, and especially environmental policy is very important in the building industry that emits 1/3 of entire CO2 emission. It is important that the sustainable architecture should be maintained socially, economically and culturally, and the effort of sustainability should be needed in the life cycle of buildings from the planning stage to the demolition.

Korea Green Building Council (KGBC), founded in 2000, recognizes that the dissemination of green building is one of the most important duties in the building construction sector with the mission of making the earth sustainable by green buildings. SUSTainable Building Research Center(SUSB), one of The Engineering Research Center (ERC) funded by Ministry of Science and Technology (MOST)/Korea Science and Engineering Foundation(KOSEF), which a consortium of 7 universities, has also been established in 2005, and has been conducting researches regarding sustainable architecture. The two organizations have participated in SB05Tokyo held in Oct., 2005, had an in-depth discussion on the direction of sustainable architecture in Korea, and agreed to host SB07Seoul jointly, which will be held prior to SB08, Melbourne, Australia.

Important Dates

Submission of abstracts	15 March 2007
Acceptance of notification	25 March 2007
Submission of final papers	25 April 2007
Acceptance of final papers	7 May 2007
Conference	27-28 June 2007

Conference Topics

- Sustainable Urban Design & Regeneration
- Sustainable Policies, Systems, Codes
- Energy Use and Climate
- Building Environmental System
- Living Environment
- Assessment Tools (Environment Performance, CO2 and Amenity Evaluation, GBCC, CASBEE, GBTOOL, LEEDS, BREEAM etc.)
- Sustainable Building Design
- Sustainable Structural System
- Sustainable Building Materials
- Sustainable Construction Management
- Facility Management of Sustainable Buildings
- Sustainable System for High-rise Buildings
- Sustainable Building Education
