International Council for Research and Innovation
in Building and Construction

Providing a global network for international exchange and cooperation in research and innovation in building and construction, in support of an improved building process and of improved performance of the built environment.

October 2007

Forthcoming Meeting

W096 – Architectural Management / TG49 – Architectural Engineering

Design Management in the Architectural Engineering and Construction Sector

São Paulo, Brazil, 4 – 8 November 2008

Aim

This conference looks at how design management is performed in the Architectural, Engineering and Construction (AEC) sectors around the world - the main approaches and techniques, the challenges and opportunities – in an attempt to map and analyse “best in class” approaches. Documented cases from industry demonstrating best practice, recently completed PhDs and research projects are welcome. All papers will be subject to a double blind refereeing process. Accepted papers will be published in a book of proceedings. The conference will be held in parallel with the 8th Brazilian Workshop

on Building Design Management, with interconnecting sessions.

Conference Themes

The following themes are for guidance and should be interpreted widely:

- Collaborative Design Management
- Integration of Design and Engineering Knowledge
- Lean Design Management
- The Design Manager’s role
- Role of Engineering in Design Management
- Environmentally Sustainable Design and Engineering in a Digital Age

Submission

All submissions of interest/abstracts should be sent by E-mail, as an MS Word attachment, to Dr. Matthijs Prins (Prins@bk.tudelft.nl) and cc o Dr. Ad den Otter (a.f.h.j.otter@tue.nl) before the deadline.

Selected authors will be invited to revise their papers for publication in a special edition of Architectural Engineering & Design Management.
