International Council for Research and Innovation
in Building and Construction

Providing a global network for international exchange and cooperation in research and innovation in building and construction, in support of an improved building process and of improved performance of the built environment.

February 2008

Introduction New CIB Encouraged Journal

Informes de la Construcción

Recently CIB granted the status of CIB Encouraged Journal to *Informes de la Construcción*.

About the Journal

Informes de la Construcción is a scientific journal in Spanish language, published three-monthly by the Institute of Construction Sciences Eduardo Torroja (Instituto de Ciencias de la Construcción Eduardo Torroja / IETcc). This Centre belongs to the Spanish National Research Council (CSIC).

Its articles cover fields such as architecture, engineering, public works, environment, building services, rehabilitation, construction systems, testing techniques, results of research on building components and systems and so forth.

Journal's readership includes architects, engineers and construction companies, as well as researchers and professionals engaging in building construction and public works.

While *Informes de la Construcción* is a Spanish language journal, the titles, abstracts and keywords of all papers also appear in English.

Aims and Scope

Informes de la Construcción founded in 1948, has been since then an open and lively forum for scientific and technical divulgation and debate in all areas concerning construction and related fields. Since then it has fulfilled an effective function informing professionals about every single aspect of the construction process from the earliest analysis until the final work.

Its topics cover all the aspects related with:

- Building and civil works
- Research on new materials and techniques
- Restoration and preservation of historical heritage
- Environmental impact on civil works
- Calculus methods
- Installations, conditioners

The periodic monographic issues of *Informes de la Construcción* are considered valuable reference works for specialist in the above-mentioned fields.

Its special Latin-American projection appoints *Informes de la Construcción* as the essential reference

authority accessible in Libraries and Universities of most Latin American countries.
