International Council for Research and Innovation
in Building and Construction

Providing a global network for international exchange and cooperation in research
and innovation in building and construction, in support of an improved building
process and of improved performance of the built environment.

May 2009

CIB Priority Theme: Sustainable Construction

Portal for SB10/11 Conference News

Information about the upcoming conferences on sustainable building and construction, known as the SB10/11 Conference series, is now easier to find, thanks to a new portal at www.cibworld.nl/site/sb10-11conferences.html.

As plans for the various proposed Conferences (there are 9 in the SB10 series) begin to gel and their organisers begin to make public announcements, CIB is keen to assist with articles in the CIB Newsletter, which reaches an estimated 50,000 or more people worldwide who are interested in building and construction matters.

The new portal not only provides a site on which all the Conferences, their locations, dates, themes and contacts, are shown, but also includes easy access to the CIB news articles that have been published about each Conference in the series.

Most importantly, with the use of hyperlinks the portal can be made part of the websites established for each SB10 and SB11 Conference.

The SB10/11 Portal will be in place for the duration of the SB10/11 Conferences, which will run throughout 2010 and into 2011.
