Global Summit on the Sustainable Built Environment

2010 Shanghai: Policy, Science and Technology on Urban Development in the New Decade

Pudong Shangri-La Hotel, Shanghai, China - Aug 16-20, 2010

16-20 August 2010, Shanghai, China

The "Better Building – Better World" Global Summit on the Sustainable Built Environment, will take place at the Pudong Shangri-La Hotel in Shanghai, China in conjunction with the 2010 World Expo in Shanghai 16-20 August 2010.

This Summit convenes business leaders, visionary policy-makers, and world-leading scientists to share knowledge on how building and urban developments are affecting the global climate.

In alignment with the Expo theme - Better City, Better Life, the Summit aims to raise the awareness of people to the significant role of building operations as one of the major contributors to climate change. The Summit calls for action with scalable, proven and emerging policies, metrics, methods, practices, and technologies, to take every opportunity to mitigate climate change in the next decade and beyond.

Policy makers, developers, architects, engineers, construction professionals, scientists and researchers will gain valuable insights and develop new interdisciplinary and cross-functional collaboration opportunities through a series of keynotes, case studies, tours, exhibitions, and interactive sessions.

The solution to the challenge to develop the planet sustainably lies at the intersections of the natural and social sciences, design, engineering, business, and public policy. The 2010 World Expo in Shanghai is the ideal launching pad for a serious, interdisciplinary, inter-organizational, and global treatment of the

sustainable development of buildings and infrastructure in their natural, economic, and social contexts.

Attendees can experience the innovative design and technology showcases in over 45 international pavilions at the Expo, right at the heart of China's financial capital of Shanghai. The summit will include tours of international pavilions and presentations on sustainable development approaches that exemplify the vision and model of design, sustainability, and technology for the new decade.

Conference Venue

Pudong Shangri-La in Shanghai

Registration Details

Individual:	\$1,400
Sponsor:	\$1,300
CIB Members	\$1,300
Group of 4 or more:	\$1,200
CIFE Member:	\$1,200

Attendees' names can be substituted within the same company / organization.
 Please contact: cife-email@lists.stanford.edu.
