Introduction

The organizer in cooperation with CIB invites all participants to the 28th International Symposium on Automation and Robotics in Construction (ISARC2011), which will be held from June 29th to July 2nd, 2011 in Seoul, Korea.

The ISARC 2011 will be an exciting and informative meeting, continuing the tradition of ISARC 2011 to present the most current international discoveries in the field of automation and robotics in construction. Over 300 papers will be presented, and ISARC 2011 will be the most and the best ISARC symposium in history.

Conference Topics

The conference topics are:
- Augmented and Virtual Reality
- Advanced Computing in Construction
- Architecture and Planning
- Automation and Robotics in Building Construction
- Automation and Robotics in Civil Engineering
- Automation in Maintenance and Inspection
- Building Information Modeling
- Collaborative Design and Construction
- Computational Mechanics
- Computer-aided Construction and Management
- Computer-aided Design
- Computer-aided Education and Training
- Computing for Conceptual Design
- Decision Support Systems
- Disaster Preparedness, Response and Recovery
- Distributed Computing in Engineering
- E-commerce
- Energy Efficiency
- Field Robotics
- Geographic Information Systems
- Management Issues in Construction
- Project Information Management
- Sensing Technology for Construction and Maintenance
- Service Robotics
- Space and Extreme Engineering Application

Key Deadlines

Conference dates 29 June - 2 July 2011

Additional Information

For further information about the conference visit the designated website at www.isarc2011.org.
